

List of Successfully Tested Smart Devices

This page provides a current list of smart devices tested to help you choose or, use as reference, prior to using VehicleMRI. The devices tested are considered the most frequently seen in circulation at the time of the test. References to the product listed here do not constitute an endorsement of such hardware. DENSO is not responsible for resolving problems with, or providing support or fixes to, the operating system itself.

You can download the complete list (as PDF).
